## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: In regards to claims 1, 3, 4, 5, 6, and 12, the limitation whereas a high-frequency switch circuit common to high-frequency signals of a plurality of frequency bands comprising: a branching circuit comprising a first high-frequency circuit comprising a first phase shifter connected to said first terminal and a first bandpass filter disposed downstream thereof, and a second high-frequency circuit comprising a second phase shifter connected to said first terminal and a second bandpass filter disposed downstream thereof, a transmission line for constituting said first phase shifter having such a line strength that the impedance of said first high-frequency circuit viewed from the input side is substantially open at a passband frequency of said second bandpass filter, a transmission line for constituting said second phase shifter having such a line strength that the impedance of said second high-frequency circuit viewed from the input side is substantially open at a passband frequency of said first bandpass filter, whereby one received signal in said first and second frequency bands is permitted to pass while the other received signal is shut off, is neither taught, nor made fairly obvious by any prior art. No prior art was found that discloses or teaches all of claims 1, 3, 4, 5, 6, and 12 limitations.

Art Unit: 2642

3. Claims 2, 7-11, and 13-18 are dependent upon claims 1, 3, 4, 5, 6, and 12, therefore claims 2, 7-11, and 13-18 are allowed.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miya (US 6,011,450) teaches a semiconductor switch having plural resonance circuits therewith. Kato et al (US 6,070,059) teach a high-frequency switch.

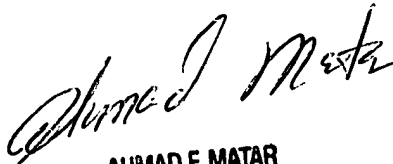

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P. Knowlin whose telephone number is (571) 272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (571) 272-7488. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
